## Host Organisation

### Australian and New Zealand Orthopaedic Research Society (ANZORS)

The purpose of ANZORS is to promote, support, develop and encourage research in orthopaedics, musculoskeletal disorders, diseases and injuries and in their management; to provide a forum for the sharing and dissemination of knowledge in these fields.

ANZORS will celebrate its 31<sup>st</sup> anniversary in 2025 and is a founding member of ICORS. ANZORS represents a stream of basic and applied scientists, orthopaedic surgeons, biomedical engineers, rheumatologists and industry scientists who have passion, dynamics and motivation to pursue orthopaedic research. The orthopaedic research community in Australia and New Zealand, and around the world, is rapidly expanding. Several areas, including molecular biology research, therapeutic lineage specific cell therapy, orthopaedic bioengineering, prosthesis design and postoperative assessment are becoming the focus of research by our members. Thus, communication between groups for encouragement of interdisciplinary collaboration is the foremost goal for ANZORS. In 2020, ICORS awarded ANZORS to host its 2025 meeting in Adelaide, Australia. This will be the first ICORS meeting in the southern hemisphere and will showcase some of the world's most innovative orthopaedic research.

# Welcome

We are delighted to announce the 2025 World Congress of Orthopaedic Research and the 12<sup>th</sup> International Combined Orthopaedic Research Societies Congress (ICORS).

Held every three years, the congress is the premier opportunity for orthopaedic research societies from around the world to come together in one place to share the latest innovations of the field. This will be the first time the meeting has been held in the Southern Hemisphere. The Congress brings together scientists, engineers and clinicians working on topics ranging from new surgical approaches and clinical outcomes to novel animal models of musculoskeletal disease to the latest innovations in medical imaging. We are delighted to host the meeting in Adelaide, a city internationally renowned for producing some of the most influential orthopaedic research in recent decades.

We plan to establish a world class program of keynote speakers from researchers at the cutting edge of their respective fields. We anticipate that the congress will offer a platform for the brightest minds in the field of orthopaedic research to present their work through a mix of workshops, oral presentations, and poster presentations. The workshops, along side the keynote presentations, form the kernel of the congress. Workshops will be coordinated by member societies to present highly relevant focused sessions that promote robust discussion across all career stages.

We welcome you as a prospective sponsor to join us in Adelaide to celebrate the best of orthopaedic research.

## Sustainability Matters

We are very pleased and excited to make ICORS 2025 as sustainable as possible to reduce the carbon footprints associated with attending the Meeting.

Here are some of many ways we will be practising sustainability:

- recycling of packaging
- donatable goods, equipment, and furniture, and
- reduce waste as a whole
- charity donations rather than speaker gifts
